

Ship Operation

BUL reputation as Shipping Company that operates several ships types, either owned or chartered, has encouraged the corporation to continuously perform procurement on ships in order to tote up the present armada force and to fulfill the increasing demand on national marine transportation.

With its experience in operating 8 unit of logging carrier, 1 unit of chemical carrier, 2 unit of fertilizer carrier, 2 units of full container carrier, all of which are owned by BUL, had turn BUL Corporation into respected and relatively powerful shipping company in Indonesia.

These experiences had also draw extended trust from renowned companies such as PT. PUSRI and PT. PKT as a leading fertilizer company in Indonesia and also Total Indonesia Oil, an offshore exploration company.

In conjunction with the rising activity in Mining Product (coal, Iron-ore, etc) and in Crude Palm Oil (CPO) trading, and also encouraged by Government Regulation through INPRES No. 5, Year 2000; BUL had strengthen its intention to tote up its armada with Bulk Carrier and Tanker Vessel in order to fulfill its joint venture Agreement with Coal and CPO producers.

To support its shipping operation, BUL is attributed with certificates such as ISM Code & ISPS Code and Vessel Work Shop; all of which are obligatory by both National and International Shipping Standard. In relation with services quality assurance, BUL also hold ISO 9001 and satisfactory Crewing & Maintenance System which is based on Quick Operation and Safe Handling.
